

Parent and Educator Reviews of Fast ForWord®

Testimonials from Scientific Learning Facebook postings.

"My son did the Fast ForWord program in 6th grade. He jumped from the 3rd percentile to the 90th percentile in just 6 weeks. Amazing. Now he is doing extremely well as a computer science major at Utah State University. Love this program for auditory processing disorder."

"This really helped my daughter. She passed her first attention test ever after working through this program. She was sad when she 'graduated' from Fast ForWord."

"My 15 year old did Fast ForWord in grade school, because of dyslexia. Helped her grades improve and believe that it continues to help now! Awesome program!"

"My son has an auditory processing disorder. Fast ForWord helped him significantly with his processing and reading!"

"I have seen very good results with the spectrum students we have run on Fast ForWord. The changes I have seen are priceless."

"My oldest did two programs (one before 6th grade, the other before 7th). He had major learning issues & had never been at grade level for reading or writing before Fast ForWord. He was in resource room and had adapted curriculum in these subjects. Plus, I had to spend at least an hour a night helping him with homework. He is now in 9th grade, fully independent, doing regular curriculum with no adaptations, and has a 4.0. He now tests above grade level in reading & is a great writer. I never imagined he would be this successful in academics, and I firmly believe Fast ForWord was the key to his success. He is a hard worker and very determined, but Fast ForWord gave him the boost he needed. It was the best intervention we invested in."

"My son uses this and is finally making reading progress."

"I cannot tell you how appreciative I am for this program. It changed my son's life bc he now enjoys reading and we all know that makes a successful learner."

"My son was at a 2nd grade 4th month reading level when he entered 4th grade, even after I had him repeat a grade. He "graduated" from the Fast ForWord program reading ABOVE his grade level. He will enter 5th grade this next school year at the appropriate grade level because of Fast ForWord. It really DOES work and it's fun for the kids too because they get to work at their own pace and "play games" to learn."

"Great program! My son made great progress - went up several grade levels."

"I could write a book on all the changed lives I have seen after students used Fast ForWord."

"Worked wonders for my daughter."

"My daughter loved the program and we had good results."

"We have completed two rounds of Fast ForWord with wonderful results. I highly recommend this program!"

"This is a great program! 8 weeks in and we have seen improvements!"

"My 9 year old son has been doing the Fast ForWord program for about 3 months with great success!"

"My daughter started using this program 10 months ago and has made drastic improvements!"
